第 6 問 次の英文は、Kyoko がペット(pets)について調べたことを英語で発表した際のスピーチ原稿です。この英文を読んで、あとの問い(問 1～5)に答えなさい。

Today I will talk about pets. Here is a number: ¥1,500,000,000,000. What is this amount of money spent on? That's the money that people in Japan spend to buy and *feed their pets each year. Do you have any pets? I have asked my parents to have a dog many times, but I don't have any pets. Anyway, why is having pets good? I would like to tell you three good points about having pets. 5

First of all, pets can help you to live longer, healthier lives. People who have pets *tend to have lower *blood pressure and *heart-disease risk than people who don't have pets. There are two main reasons for that. The first reason is that animals can help to *calm people. When people touch and talk to their animals, their blood pressure goes down. The second reason is that pet owners have more chances to play and walk with their pets, so animals help people to get daily exercise. 10

Secondly, pets can help children with their learning. Having a pet at an early age can make children more confident. Pets are natural listeners, so children may feel more comfortable practicing their reading aloud in front of a pet than people. 15 Children can also learn responsibilities by taking care of their pets. Tasks such as walking dogs or cleaning the doghouse give children *a sense of responsibility and achievement.

Lastly, pets can help people make new friends. There are many friendly pet owners in your community. You often find that people stop to talk to someone about their dogs in the park. Having pets is a good way to meet new people and make new friends easily. 20

The other day, I saw an interesting report on the news. A girl was almost crying because she had to get *the COVID-19 vaccine at a hospital. Then a dog named Ollie came in and sat at her feet. When she saw the dog, it helped her to calm down. As you can see, pets can be useful and helpful to us. I think pets will make our lives better. Thank you for listening. 25

*feed 飼育する *tend to ~ ~する傾向がある *blood pressure 血圧
*heart-disease 心臓病 *calm 落ち着かせる, 落ち着く *a sense of responsibility and achievement 責任感と達成感 *the COVID-19 vaccine コロナワクチン
