次の英文は、Koharu が代替肉（meat alternatives）について調べたことを英語で発表した際のスピーチ原稿です。この英文を読んで、あとの問い（問1～5）に答えなさい。

I went to A&W, a fast-food restaurant, with my family the other day. My mother ordered “the ZEN hamburger.” I also tried it for the first time. It was very delicious. However, it was very different from the other hamburgers. It looked like a regular hamburger but surprisingly it was made not from meat like beef, chicken or pork but from “Daizu Meat.” It was made from soybeans. The soybean hamburger looked and tasted like a meat hamburger. I have never heard of soybean hamburgers before. 5

These days, not only A&W but also many supermarkets and restaurants sell food made from “Daizu Meat” as well as animal meat. They are kinds of food which look and taste like meat. They are called “meat alternatives.” This word, “alternatives” sounds very difficult. Many of you have never heard of this word. It means to use something in place of something. Soybeans are used in place of meat therefore these plants or vegetable-based products are called “meat alternatives.” They are also called “fake meat” because they are not real meat. 10 15

There are mainly two types of meat alternatives. One is made from plants like soybeans, vegetables, cereals, and nuts. “Daizu Meat” is one of them. The other one is *lab-grown meat. Lab-grown meat is made by scientists. They take pieces of animal *muscle and *cells, and put them in a clean *lab. Every 24 hours or so, these cells will have *doubled. Meat alternatives are becoming popular in the world now. Why are meat alternatives needed among people? Cow *burps include lots of *methane and *greenhouse gases that cause global warming. *The livestock industry needs large area of land to grow cows, pigs, and chickens and this causes *deforestation. Many people now worry about these environmental problems. They have begun to eat these meat alternatives instead of eating meat. Meat alternatives are good for animals and your health too. 20 25

*lab-grown meat 培養肉・人工肉 *muscle 筋肉 *cells 細胞
*lab = laboratory 実験室 *double 二倍になる *burps げっぷ
*methane メタン（二酸化炭素に次いで地球温暖化に及ぼす影響が大きい）
*greenhouse gases 温室効果ガス *The livestock industry 畜産業
*deforestation 森林破壊
